

Application No. 09/892,753

AMENDMENTS TO THE CLAIMS

A detailed listing of all claims that are, or were, in the present application, irrespective of whether the claim(s) remains under examination in the application are presented below. The claims are presented in ascending order and each includes one status identifier. Those claims not cancelled or withdrawn but amended by the current amendment utilize the following notations for amendment: 1 deleted matter is shown by strikethrough for six or more characters and double brackets for five or less characters; and 2. added matter is shown by underlining.

- 
1. (Original) A rotating punching accessory, used in combination with a standing punching bag, comprising:
    - a support plate;
    - an attaching means for attaching the support plate to the top of a punching bag;
    - a rectangular arm;
    - a rotating means for rotating the rectangular arm in a clockwise and counterclockwise direction on top of the support arm.
  2. (Original) The rotating punching accessory according to claim 1, wherein said attaching means are nuts and bolts.
  3. (Original) The rotating punching accessory according to claim 1, wherein said rotating means is a bearing and support axle centered on top of the support plate equidistant from each end of the rectangular arm.
  4. (Original) A rotating punching accessory, used in combination with a standing punching bag, comprising:
    - a support plate;

Application No. 09/892,753

an attaching means for attaching the support plate to the top of the punching bag;  
a rectangular arm;  
a rotating means for rotating the rectangular arm in a clockwise and counterclockwise direction on top of the support plate; and  
a punching pad that is located on each end of the rectangular arm.

5. (Original) The rotating punching accessory according to claim 4, wherein said attaching means is a hook and loop fastener situated on the top side of the standing punching bag.

6. (Original) The rotating punching accessory according to claim 4, wherein said rotating means is a bearing and support axle centered on top of the support plate equidistant from each end of the rectangular arm.

7. (Original) A rotating punching accessory, used in combination with a hanging punching bag, comprising:

a rotating ball bearing support plate;  
an attaching means for attaching the rotating ball bearing support plate to the hanging punching bag;  
a rotating rectangular arm;  
a rotating means for rotating the rectangular arm in a clockwise and counterclockwise direction on top of the support plate; and  
a punching pad that is located on each end of the rectangular arm.

Application No. 09/892,753

8. (Original) The rotating punching accessory according to claim 7, wherein said attaching means are hooks that are attached to hanging chains that go through eyelets provided on the rotating ball bearing support plate.
